UX/UI Designer, Creative Lead

# DESIGN WORK SAMPLES

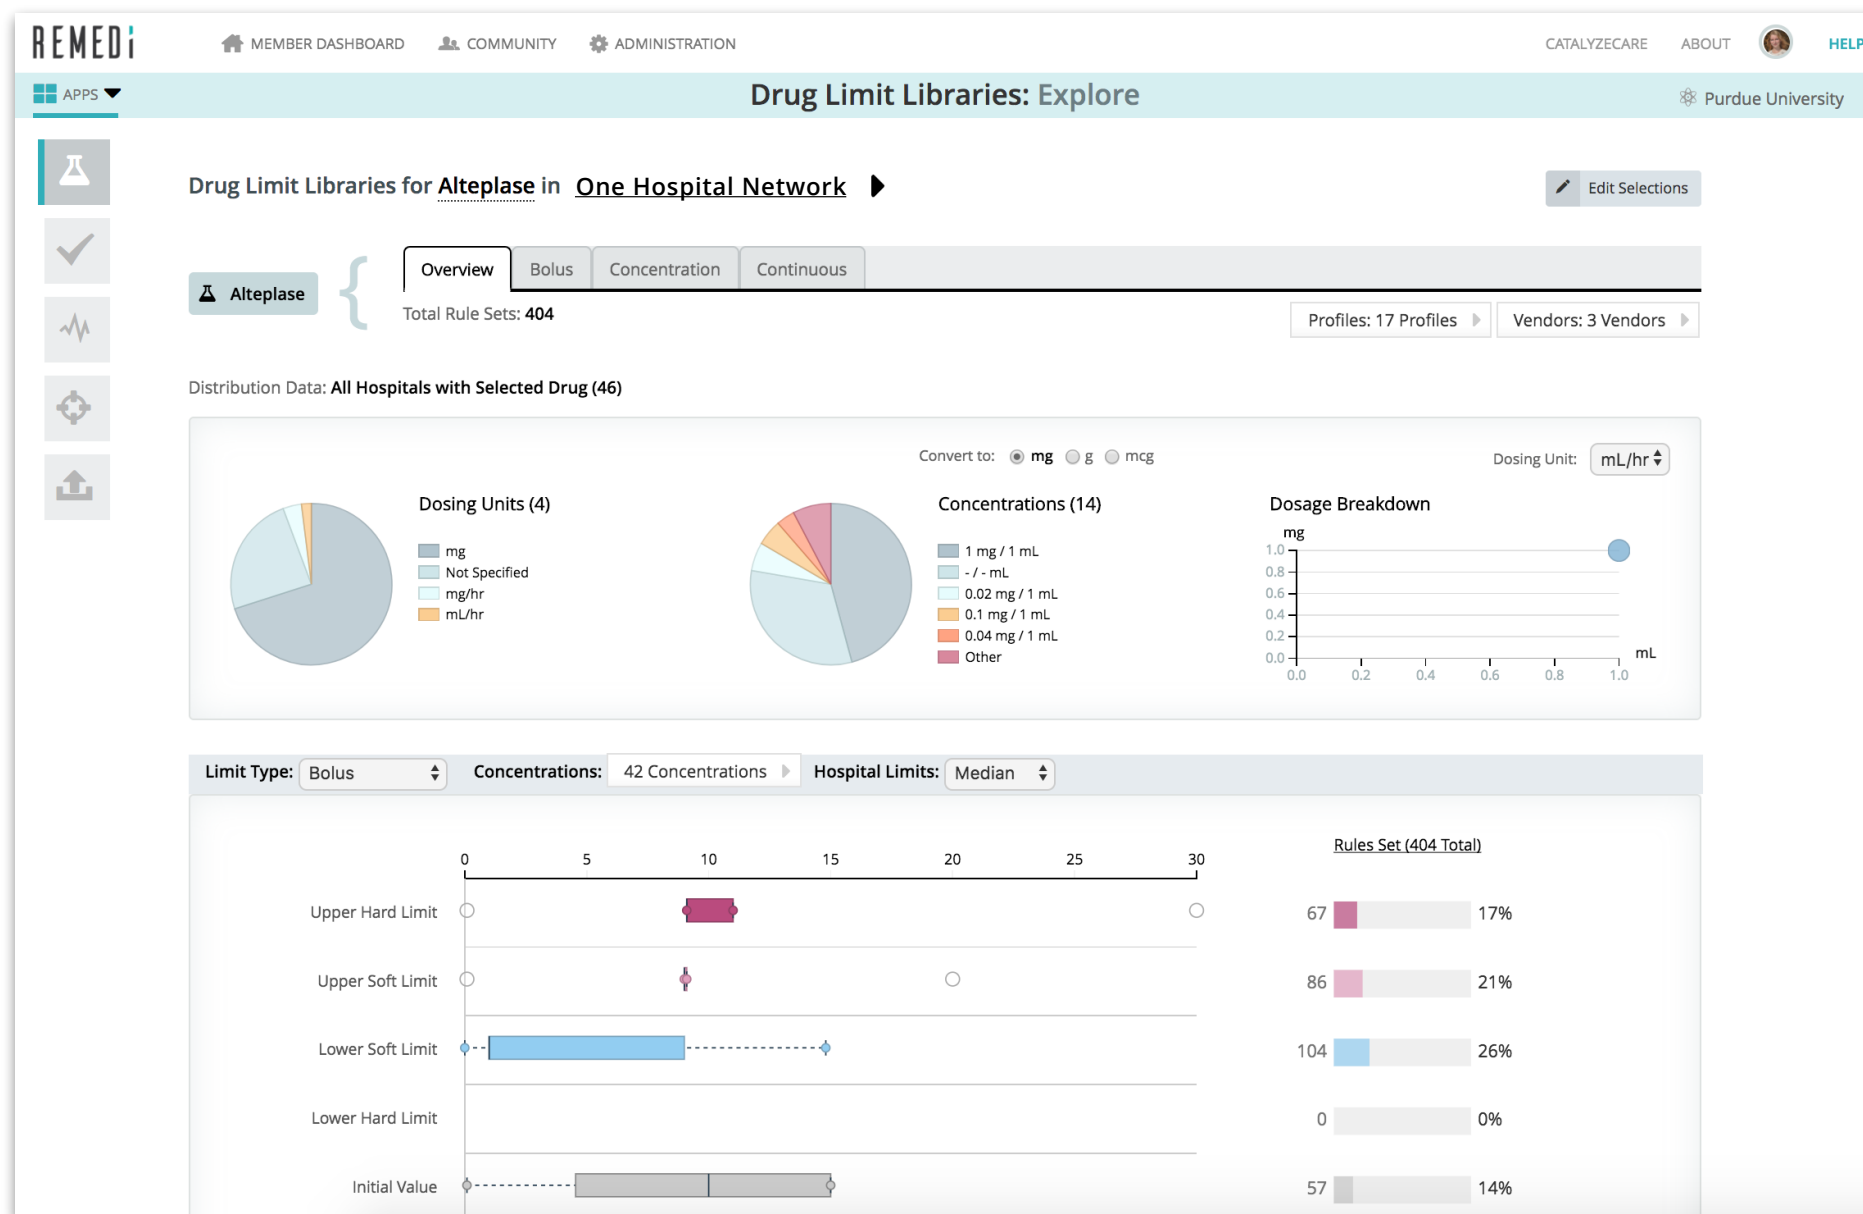

anedossekina@gmail.com  
snowwitje.github.io

(latest work) 2015-2018

# REMEDI platform

## Drug Limit Libraries tool. Statistical view.

### USERS

Hospital pharmacists and nurses, members of REMEDI.

### USER GOALS

View common concentrations, dosing units and dosage for a particular drug or fluid; compare hospital settings on infusion pumps to other hospitals.

### MY WORK

Design of the app from A to Z - UI, user flow and interaction.

HTML, CSS and JavaScript coding of the interactive prototype and final app.

D3.js coding of the charts.

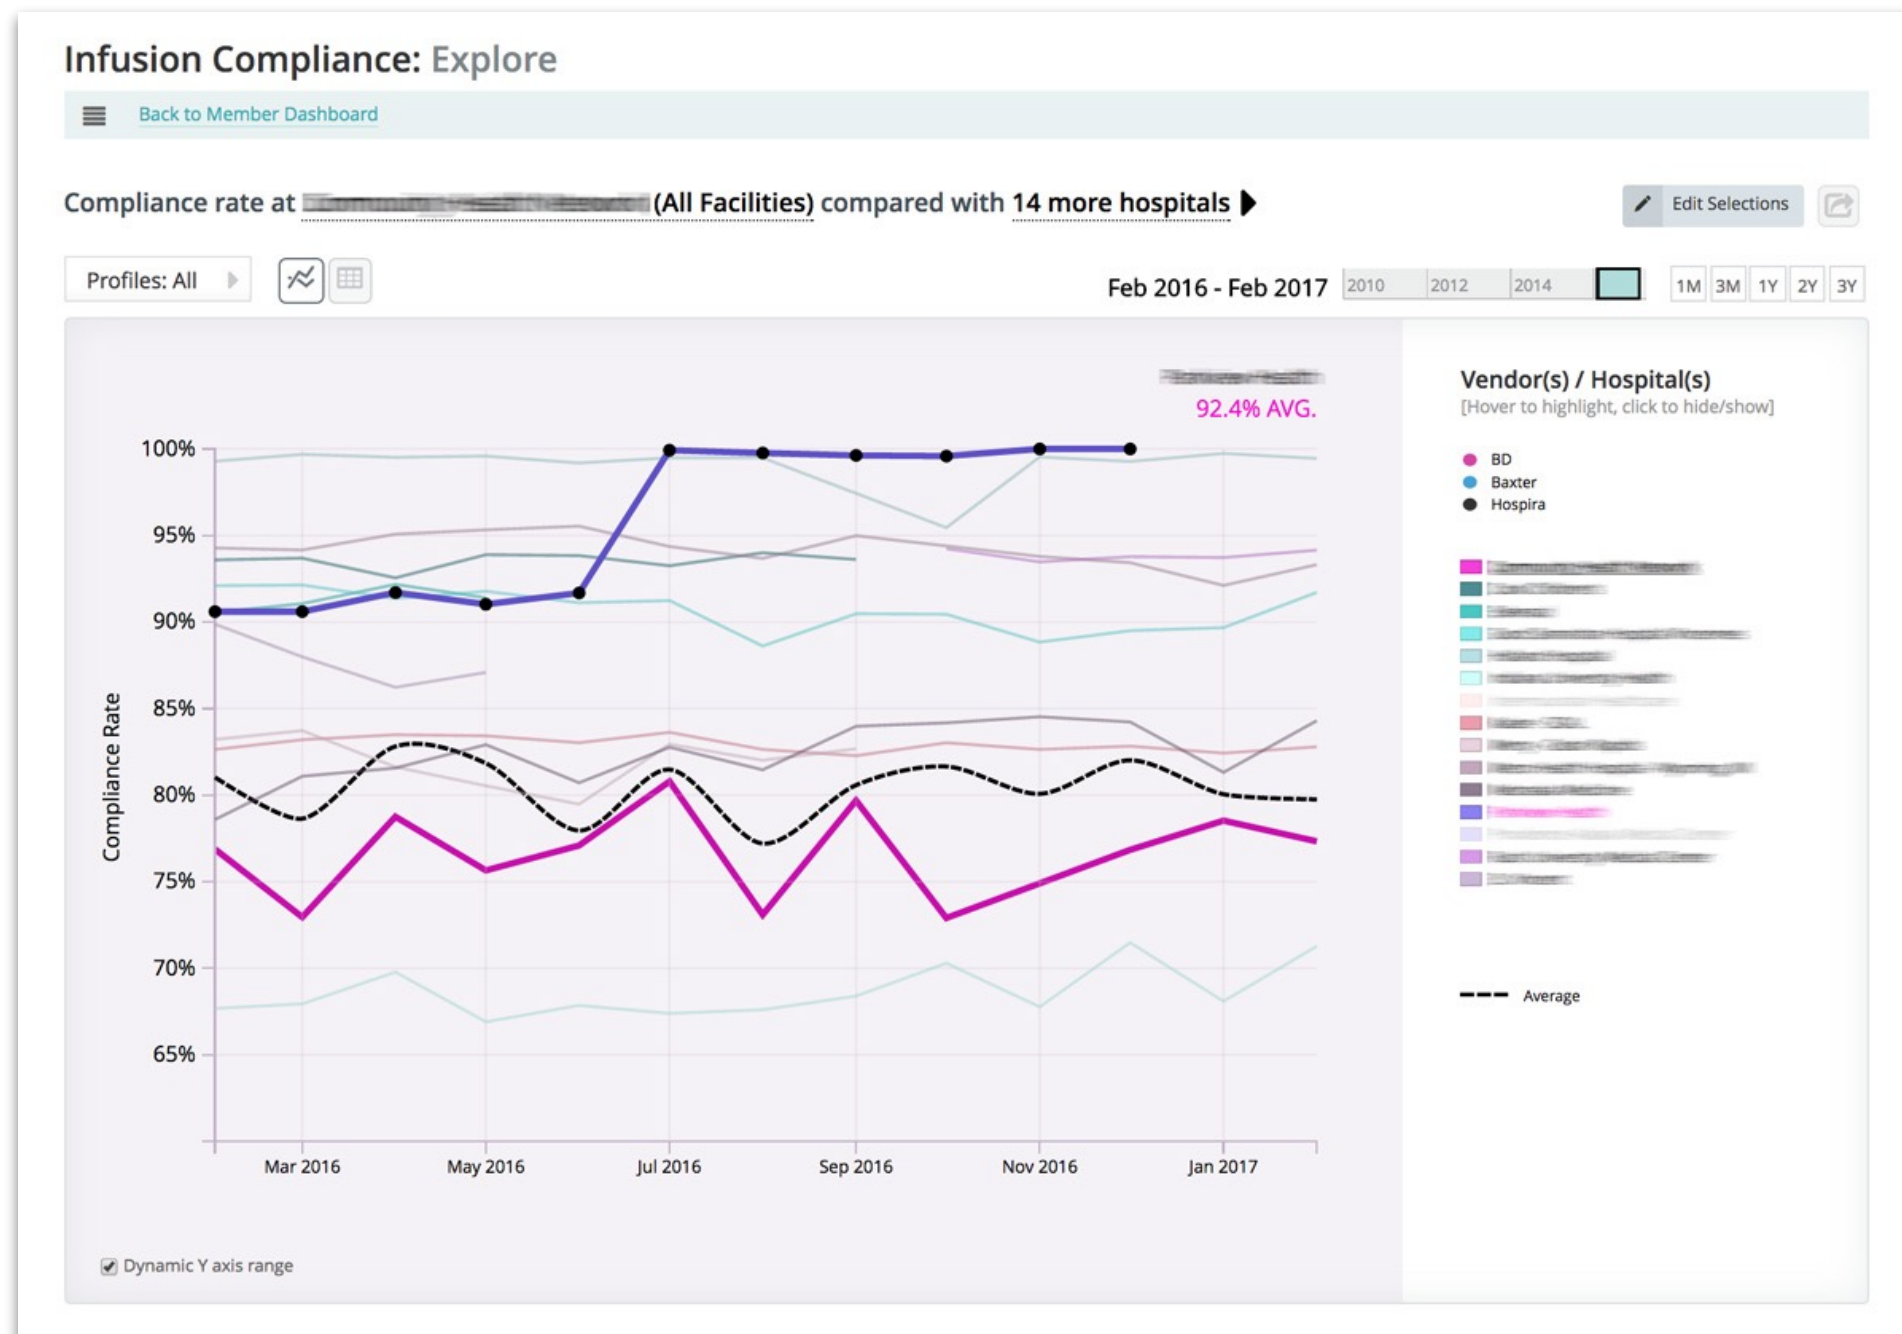

UI coding in ClojureScript + React.js.

**This applies to all REMEDI work samples shown:**  
REMEDI responsive template design and style guide.

PHP+MySQL programming to integrate with HUBzero platform.

# REMEDI platform

## Infusion Pump Compliance tool. Chart view.

### USERS

Hospital pharmacists and nurses, members of REMEDI.

### USER GOALS

View trend in smart pump compliance in member hospital and benchmark against other hospitals.

### MY WORK

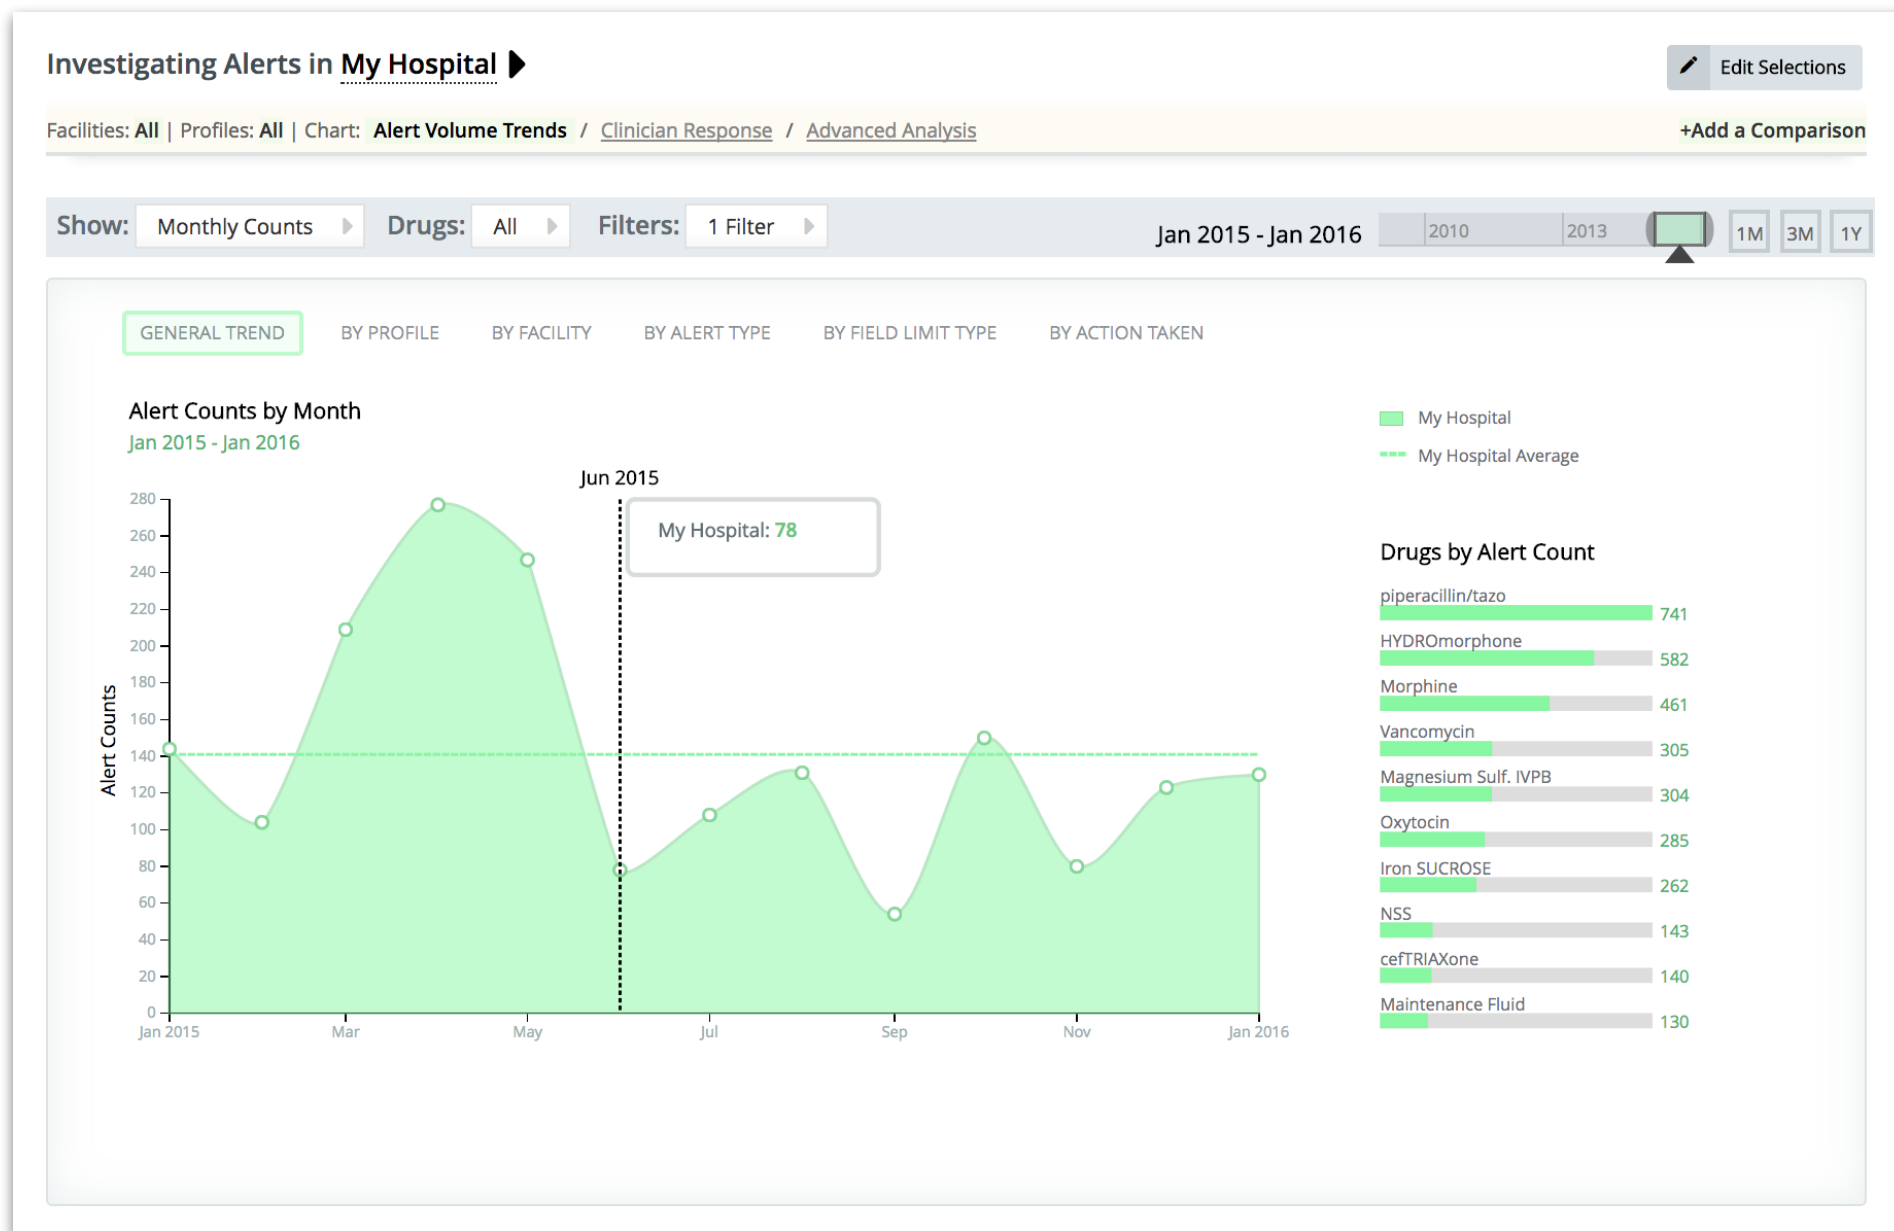

Design of the app from A to Z  
- UI, user flow and interaction.

HTML, CSS and JavaScript coding of the interactive prototype and final app.

D3.js coding of the charts and UI components (time picker).

# REMEDI platform

## Infusion Pump Alerts tool.

### USERS

Hospital pharmacists and nurses, members of REMEDI.

### USER GOALS

Analyze how alert volume changed each month or by time of day, which drugs/fluids generated most alerts and how clinicians responded to alerts.

### MY WORK

Design of the app from A to Z - UI, user flow and interaction.

HTML, CSS and JavaScript coding of the interactive prototype and final app.

D3.js coding of the charts and UI components (time picker).

# REMEDI platform

## Data Uploader app.

### USERS

Hospital pharmacists and nurses, members of REMEDI.

### USER GOALS

Load medical device data into REMEDI; map hospital-unique nomenclature to standard names to simplify cross-hospital comparison.

### MY WORK

Design of UI, user flow and interaction. HTML, CSS and JavaScript coding. UI coding in ClojureScript + React.js.
